Yes come up to the 11th floor east end receptionist desk and ask for me. I booked a conference room on the 13th floor because there were none available on the 11th.

See you tomorrow!

Subject: West Vermont Street Groundwater Contamination

Charlie:

I am requesting US EPA assistance on behalf of Mr. Harry Atkinson, Chief, State Cleanup Section, to provide assistance and relief to residents located on West Vermont Street west of the intersection of Holt Road in Indianapolis, Indiana that have private wells impacted by vinyl chloride at levels above US EPA action levels. The neighborhood contains approximately 25 homes on private wells. The homes are located on two streets that do not have municipal water. It is hoped that an alternate source of water can be immediately provided and a long term solution to the contamination can be found.

Available data collected by the Marion County Health Department is included and attached.

If you need assistance or have questions about the site I can be contacted 24hrs at 317-691-6370.
